## **3rd International ICST Conference on IT REVOLUTIONS 2011**

**23-25 March, 2011**

**Rectorado of the University of Cordoba, Cordoba, Spain**

The Third International Symposium IT Revolutions 2011 will bring together top technical professionals from industry, researchers and academia to exchange information and results on recent work on systems, technologies, processes and applications.

The conference will address current and future trends in the state of technology aimed at solving and managing daily practices and fostering interdisciplinary collaborative research in this area. The conference will focus on all aspects of the role and deployment of the new information and communications technologies in the 21st Century lifestyle, with special attention to the newest emerging wireless technologies and their integration in any life scenario, covering topics ranging from eHealth and Ambient Assisted Living to Energy Sustainability and Smart Grids applications and practices.
